

AK CONCERTS — MASTER SHEET GUIDE

PART 1: Google Apps Script Web App & Submission Listener Setup

■ Overview

This guide provides step-by-step instructions for creating, configuring, and deploying the Google Apps Script Web App listener that accepts live event submissions and venue claims from <https://akconcerts.com/submit> and logs them directly into the Master Google Sheet.

1. Master Sheet Structure setup

Create a tab in your Master Google Sheet named **Pending Submissions** (or **Master Events**).

Ensure Column Headers (Row 1) are set as follows:

Column	Field Name	Description
A	`Timestamp`	Submission Date/Time (e.g. `2026-08-12 22:45:00`)
B	`Title`	Event Title / Artist Name
C	`Date`	Event Date (`YYYY-MM-DD`)
D	`Time`	Show/Door Time (e.g., `8:00 PM` or `9p-1a`)
E	`City`	Alaska City (e.g. `Anchorage`, `Juneau`, `Homer`)
F	`Venue`	Venue Name (e.g. `Williwaw Social`, `Koot's`)
G	`Category`	Category (`music`, `comedy`, `dance`, `festival`, etc.)
H	`Cost`	Admission / Ticket Price (e.g. `\$15` or `Free`)
I	`TicketUrl`	Ticket Link or Info URL
J	`Email`	Submitter Email Address
K	`SubmitterName`	Submitter Full Name
L	`Notes`	Additional Details / Claim Notes
M	`Status`	**`Pending`** (Default) or **`Approved`**

2. Google Apps Script Code (`Code.gs`)

1. Open your Master Google Sheet.
2. Click **Extensions** ➔ **Apps Script**.
3. Replace all code in **Code.gs** with the snippet below:

```

function doPost(e) {
  try {
    var sheet = SpreadsheetApp.getActiveSpreadsheet().getSheetByName("Pending Submissions")
    || SpreadsheetApp.getActiveSpreadsheet().getActiveSheet();
    var data = JSON.parse(e.postData.contents);

    var timestamp = new Date().toISOString();
    var status = "Pending"; // All web submissions default to Pending for moderation

    sheet.appendRow([
      timestamp,
      data.title || data.venueName || "",
      data.date || "",
      data.time || "",
      data.city || "",
      data.venue || "",
      data.category || "music",
      data.cost || "",
      data.ticketUrl || "",
      data.email || "",
      data.submitterName || "",
      data.notes || "",
      status
    ]);

    return ContentService
      .createTextOutput(JSON.stringify({ "status": "success", "message": "Submission recorded successfully." }))
      .setMimeType(ContentService.MimeType.JSON);

  } catch (error) {
    return ContentService
      .createTextOutput(JSON.stringify({ "status": "error", "message": error.toString() }))
      .setMimeType(ContentService.MimeType.JSON);
  }
}

```

3. Deployment Instructions

1. Click **Deploy** → **New deployment**.
2. Select type: **Web app**.
3. Description: **AK Concerts Event Submission API v1.0**.
4. Execute as: **Me (your-google-account@gmail.com)**.
5. Who has access: **Anyone** (allows the website frontend to POST submissions without OAuth prompt).
6. Click **Deploy** and authorize permissions.
7. Copy the generated **Web App URL** (e.g., <https://script.google.com/macros/s/.../exec>).

4. Linking to AK Concerts Website

Add the Web App URL to your Cloudflare Pages / Vercel Environment Variables:

PUBLIC_SUBMIT_FORM_URL="https://script.google.com/macros/s/YOUR_SCRIPT_ID/exec"
